

THE EVOLUTION OF FERTILISERS

DINO FERT™

DINOFERT PUTS LIFE BACK INTO YOUR SOIL AND PROVIDES A BUFFET OF NUTRIENTS FOR PLANTS.

ONE PELLET OF DINOFERT CONTAINS BENEFICIAL SOIL BACTERIA, YEAST, HUMUS, AMINO ACIDS AND ALL NUTRIENTS THAT ARE ESSENTIAL FOR PLANT GROWTH.

Major Elements	Trace Elements
Nitrogen (N)	Copper (Cu)
Phosphorous (P)	Zinc (Zn)
Potassium (K)	Boron (B)
Calcium (Ca)	Iron (Fe)
Magnesium (Mg)	Manganese (Mn)
Sulphur (S)	Molybdenum (Mo)

Dinofert pellet

Dinofert organic fertilisers supply plant nutrients and amend soil fertility. They are a very effective means for the increase of crop production and for improving the growing quality of food and fodder.

Dinofert organic fertilisers are ideal to be used in order to supplement the natural nutrient supply in the soil, especially to correct a nutrient deficiency (law of minimum). If any one of the above elements are missing or deficient, plant growth will be poor, even if the other elements are abundant.

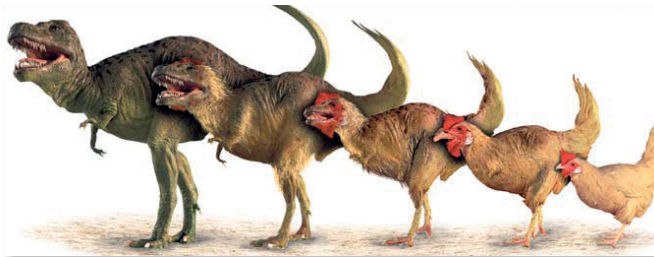

Dinofert contains all the vital nutrients essential to plant life.

Inoculate your soils with life!

THE EVOLUTION OF FERTILISERS

DINOFERT™

Dinofert Fertiliser's are brought to you by the original inventors of Dynamic Lifter, a team with over forty years experience in providing quality organic and organic based, slow release fertilisers for the home garden, agricultural and horticultural markets.

Science and history tells us that organic fertilisers have sustained plant life on earth for millions of years from the dinosaur of the Triassic period to the modern day descendant – the chicken!

THE EVOLUTION OF FERTILISERS

DINO FERT™

PREMIUM ORGANIC FERTILISERS

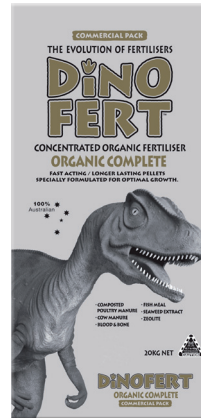

DINO FERT ORGANIC FERTILISER

Dinofert Organic Fertiliser is a pelletised, composted bio-degraded, poultry manure without the overpowering smell.

AVERAGE ANALYSIS

N · P · K
3.5 2.5 2

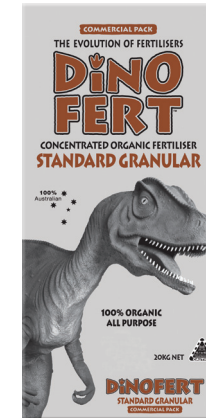

DINO FERT ORGANIC COMPLETE

Dinofert Organic Complete is a specially formulated, organically enriched blend of composted poultry manure, cow manure, blood & bone, fish meal, seaweed extract and zeolite that is pelletised for convenient application.

This advanced plant food ensures that your garden receives faster acting, longer lasting nutrients for optimal growth.

AVERAGE ANALYSIS

N · P · K
4 2 2

DINO FERT STANDARD GRANULAR

Dinofert Standard Granular is a concentrated organic fertiliser consisting of composted, bio-degraded poultry manure that is granulated, which allows good flow and spread characteristics for convenient application.

AVERAGE ANALYSIS

N · P · K
3.5 2.5 2

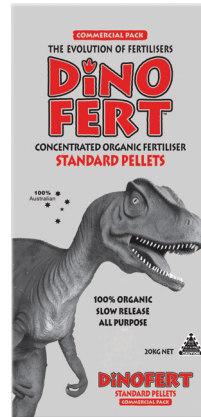

DINO FERT LAWN FOOD

Dinofert Lawn Food is a granulated, low odour blend of composted, bio-degraded poultry manure and diammonium phosphate (DAP) with good spread and flow characteristics.

AVERAGE ANALYSIS

N · P · K
5.5 4.5 2

DINO FERT STANDARD PELLETS

Dinofert Standard Pellets is a concentrated organic fertiliser consisting of composted, bio-degraded poultry manure that is pelletised for convenient application.

AVERAGE ANALYSIS

N · P · K
3.5 2.5 2

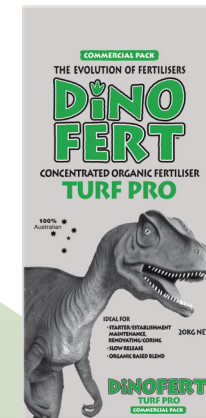

DINO FERT STANDARD FINES

Dinofert Standard Fines is a concentrated organic fertiliser consisting of composted, bio-degraded poultry manure in a smaller granule form allowing for a faster release of nutrients or where a smaller sized granule is required.

AVERAGE ANALYSIS

N · P · K
3.5 2.5 2

DINO FERT TURF PRO

Dinofert Turf Pro is an organic based fertiliser specifically formulated for grass species. This blend has been researched and proven to give spectacular results where the combination of both organic and inorganic nutrients gives grasses all their required needs to flourish.

The organic components offer the grasses a buffet of all the essential nutrients as well as amino acids, humus, beneficial bacteria, yeasts and fungus that are all necessary to establish a strong root system to support vigorous growth.

Additional (P) in the form of MOP (Muriate of Potash) is also included in this blend to help toughen your grass, increasing durability which is crucial in maintaining well trafficked areas.
